<b>Nuclear Waste Isolation</b>	
Javeri, V.	<a href="#"><u>Analysis of nuclide transport under natural convection and time dependent boundary condition using TOUGH2</u></a>
Eugster, S., R. K. Senger	<a href="#"><u>Investigation of potential water inflow into a ventilated tunnel of the proposed low/intermediate-level waste repository in Switzerland</u></a>
Bodvarsoon, G. S., G. Chen, C. Haukwa, E. Kwicklis	<a href="#"><u>The use of TOUGH2 for the LBL/USGS 3-dimensional site-scale model of Yucca Mountain, Nevada</u></a>
Reeves, M., S. Lingineni	<a href="#"><u>Drift-scale thermo-hydrologic analyses for the proposed repository at Yucca Mountain, NV</u></a>
Webb, S. W., K. W. Lason	<a href="#"><u>The effect of stratigraphic dip on multiphase flow at the Waste Isolation Pilot Plant</u></a>
Christian-Frear, T. L., S. W. Webb	<a href="#"><u>Modification and application of TOUGH2 as a variable-density, saturated-flow code and comparison to SWIFT II results</u></a>
Freeze, G. A., K. W. Larson, P. B. Davies, S. W. Webb	<a href="#"><u>Using TOUGH2 to model the coupled effects of gas generation, repository consolidation, and multiphase brine and gas flow at the Waste Isolation Pilot Plant</u></a>
Piepho, M. G.	<a href="#"><u>Preliminary analysis of Tank 241-C-106 dryout due to large postulated leak and vaporization</u></a>
Webb, S. W., K. W. Larson, G. A. Freeze, T. L. Christian-Frear	<a href="#"><u>Summary of applications of TOUGH2 to the evaluation of multiphase processes at the WIPP</u></a>
Arens, G., L. Höglund, M. Wiborgh	<a href="#"><u>Requirements on sealing measures due to gas production</u></a>
Xiang, Y., S. Mishra, B. Dunlap	<a href="#"><u>Parametric analysis of a TOUGH2 model for the unsaturated zone at Yucca Mountain</u></a>
Pruess, K., E. Antúnez	<a href="#"><u>Applications of TOUGH2 to infiltration of liquids in media with strong heterogeneity</u></a>

<b>Geothermal Reservoir Engineering</b>	
Battistelli, A., C. Calore, K. Pruess	<a href="#"><u>Vapor pressure lowering effects due to salinity and suction pressure in the depletion of vapor-dominated geothermal reservoirs</u></a>
Hadgu, T., R. W. Zimmerman, G. S. Bodvarsson	<a href="#"><u>Coupling of the reservoir simulator TOUGH2 and the wellbore simulator WFSA</u></a>
O'Sullivan, M. J., D. P. Bullivant	<a href="#"><u>A graphical interface to the TOUGH2 family of flow simulators</u></a>
Poppei, J., D. Fischer	<a href="#"><u>Prognostic simulation of reinjection—research project geothermal site Neustadt-Glewe/Germany</u></a>
Antúnez, E., M. Lippmann, M. A. Khan, T. Boardman	<a href="#"><u>Simulation of the Heber geothermal field, a TOUGH2/PC application</u></a>
Todesco, M.,	<a href="#"><u>Modeling of geothermal circulation applied to active volcanic areas—the case of Vulcano (Italy)</u></a>
Suárez A., M. C., F. Samaniego V.	<a href="#"><u>Triple-porosity/permeability flow in faulted geothermal reservoirs: Two-dimensional effects</u></a>
Moya, S. L., E. R. Iglesias	<a href="#"><u>Numerical simulation of carbon dioxide effects in geothermal reservoirs</u></a>

<b>Oil and Gas</b>	
Kovscek, A. R., T. W. Patzek, C. J. Radke	<a href="#"><u>FOAM3D: A numerical simulator for mechanistic prediction of foam displacement in multidimensions</u></a>
Witherspoon, P. A., P. Fuller, S. Finsterle	<a href="#"><u>Three-dimensional multiphase effects in aquifer gas storage</u></a>
McPherson, B., J. Bredehoeft	<a href="#"><u>Analysis of over-pressure mechanisms in the Uinta Basin, Utah</u></a>

Environmental Remediation	
Lupo, M. J., G. J. Moridis	<a href="#"><u>Predicting the distribution of contamination from a chlorinated hydrocarbon release</u></a>
Pantanzidou, M.	<a href="#"><u>LNAPL infiltration in the vadose zone: Comparisons of physical and numerical simulations</u></a>
Moridis, G. J., K. Pruess	<a href="#"><u>Air barriers for waste containment in the subsurface</u></a>
Finsterle, S., K. Pruess	<a href="#"><u>Using simulation-optimization techniques to improve multiphase aquifer remediation</u></a>
Betz, C., M. Emmert, A. Färber, R. Helmig, V. Kaleris, H. Kobus	<a href="#"><u>Soil remediation by heat injection: Experiments and numerical modelling</u></a>
Falta, R. W., S. E. Brame	<a href="#"><u>Numerical simulation of in-situ DNAPL remediation by alcohol flooding</u></a>
Webb, S. W., J. M. Phelan	<a href="#"><u>Prediction of single-component NAPL behavior for the TEVES project using T2VOC</u></a>
Oldenburg, C. M., K. Pruess	<a href="#"><u>Strongly coupled single-phase flow problems: Effects of density variation, hydrodynamic dispersion, and first order decay</u></a>
McCray, J., R. W. Falta	<a href="#"><u>Air sparging for subsurface remediation: Numerical analysis using T2VOC</u></a>
Shan, C.	<a href="#"><u>Verification of T2VOC using an analytical solution for VOC transport in vadose zone</u></a>
Ho, C. K.	<a href="#"><u>Numerical simulations of multicomponent evaporation and gas-phase transport using M<sup>2</sup>NOTS</u></a>
Seneviratne, A., A. N. Findikakis	<a href="#"><u>The effect of vadose zone heterogeneities on vapor phase migration and aquifer contamination by volatile organics</u></a>

<b>Mining Engineering</b>	
Doughty, C.	<a href="#"><u>Flow reduction due to degassing and redissolution phenomena</u></a>
Weir, G. J. S. P. White, W. M. Kissling	<a href="#"><u>Reservoir storage and containment of greenhouse gases</u></a>
Lefebvre, R.	<a href="#"><u>Modeling acid mine drainage in waste rock dumps</u></a>
Menzies, A. J., J. L. Forth	<a href="#"><u>Modeling the response of the geothermal system at Lihir Island,Papua New Guinea to mine dewatering</u></a>

<b>Simulation Methods</b>	
Oldenburg, C. M., R. L. Hinkins, G. J. Moridis, K. Pruess	<a href="#">On the development of MP-TOUGH2</a>
Zimmerman, R. W., T. Hadgu, G. S. Bodvarsson	<a href="#">A new lumped-parameter approach to simulating flow processes in unsaturated dual-porosity media</a>
Antúnez, E., K. Pruess, G. Moridis	<a href="#">Use of TOUGH2 on small computers</a>
Sato, T., T. Okabe, K. Osato, S. Takasugi	<a href="#">Graphical user interface for TOUGH/TOUGH2—Development of database, pre-processor, and post-processor</a>
Kidd, E. M.	<a href="#">Energy Science and Technology Software Center</a>
Bullivant, D. P., M. J. O'Sullivan, Z. Yang	<a href="#">Experiences using multigrid for geothermal simulation</a>
Finsterle, S., K. Pruess	<a href="#">ITOUGH2: Solving TOUGH inverse problems</a>
Moridis, G. J.	<a href="#">A new set of direct and iterative solvers for the TOUGH2 family of codes</a>
De la Torre Vega, E., M. C. Suárez Arriaga	<a href="#">DIOMRES(k,m): An efficient method based on Krylov subspaces to solve big, dispersed, unsymmetrical linear systems</a>
Manai, T.	<a href="#">EVEGAS Project</a>

<b>Vadose Zone Hydrology</b>	
Webb, S. W., J. C. Stormont	<a href="#"><u>Modeling of capillary barriers and comparison to data</u></a>
Ho, C. K.	<a href="#"><u>Assessing alternative conceptual models of fracture flow</u></a>
Montazer, P.	<a href="#"><u>AIR-TOUGH: A fully 3-dimensional linking of atmosphere with soil using eddy diffusivity concept and V-TOUGH</u></a>
Kwicklis, E. M., R. W. Healy, G. S. Bodvarsson, N. Lu	<a href="#"><u>Application of TOUGH to hydrologic problems related to the unsaturated zone site investigation at Yucca Mountain, Nevada</u></a>
